```
openshell policy get
```

show the policy the sandbox enforces now

```
cyberbird
```

the sandbox

```
--full
```

the effective policy in full: the base document plus the rules that attached providers add

printed (excerpt)

```
Status:     Effective
Source:     sandbox
...
landlock:
  compatibility: hard_requirement
network_policies:
  model_server:
    ...
```

No provider is attached to this sandbox, so the effective policy holds no provider rules.
